Chile

Also known as: República de Chile, Republic of Chile

Flag of Chile
Head Of State and Government: President: Gabriel Boric
Capital: Santiago
Population: (2023 est.) 19,980,000
Currency Exchange Rate: 1 USD equals 785.678 Chilean peso
Form Of Government: multiparty republic with two legislative houses (Senate [38]; Chamber of Deputies [120])

Chile, country situated along the western seaboard of South America. It extends approximately 2,700 miles (4,300 km) from its boundary with Peru, at latitude 17°30’ S, to the tip of South America at Cape Horn, latitude 56° S, a point only about 400 miles north of Antarctica. A long, narrow country, it has an average width of only about 110 miles, with a maximum of 217 miles at the latitude of Antofagasta and a minimum of 9.6 miles near Puerto Natales. It is bounded on the north by Peru and Bolivia, on its long eastern border by Argentina, and on the west by the Pacific Ocean. Chile exercises sovereignty over Easter Island, the Juan Fernández Archipelago, and the volcanic islets of Sala y Gómez, San Félix, and San Ambrosio, all of which are located in the South Pacific. Chile also claims a 200-mile offshore limit. The capital is Santiago.
Chile’s relief is for the most part mountainous, with the Andes range dominating the landscape. Because of the country’s extreme length, it has a wide variety of climates, from the coastal desert beginning in the tropical north to the cold subantarctic southern tip. Chile is also a land of extreme natural events: volcanic eruptions, violent earthquakes, and tsunamis originating along major faults of the ocean floor periodically beset the country. Fierce winter storms and flash floods alternate with severe summer droughts.

Much of northern Chile is desert; the central part of the country is a temperate region where the bulk of the population lives and where the larger cities, including Santiago, are located. South-central Chile, with a lake and forest region, is temperate, humid, and suitable for grain cultivation; and the southernmost third of the country, cut by deep fjords, is an inhospitable region—cold, wet, windy, and limited in resources. The economy of Chile is based on primary economic activities: agricultural production; copper, iron, and nitrate mining; and the exploitation of sea resources.

Chile exhibits many of the traits that typically characterize Latin American countries. It was colonized by Spain, and the culture that evolved was largely Spanish. However, appreciation for the influence of Indigenous culture has been growing. The people became largely mestizo, a blend of Spanish and Indian bloodlines. The society developed with a small elite controlling most of the land, the wealth, and the political life.
